

VENUE: GAYATRI VIHAR, BANGALORE PALACE GROUNDS

Coir industry is one of the traditional agro-based cottage industries concentrated in the coconut producing states in India. Coir, the golden fibre extracted from the fibrous husk covering the inner shell of the coconut, is the raw material for coir industry. The industry is important for the country, as it provides direct employment to more than seven hundred thousand people and indirect sustenance to an equal or more number. Moreover, it is mostly export-oriented and fetches valuable foreign exchange. The Industry has come a long way from its travelling labour intensive days, into an era of mechanization and automation through the sustained efforts of the Coir Board and other organisations which work in tandem with it. The efforts of the Coir Board in introducing cutting edge technology has made life easier for all who depend on this industry for a livelihood. At this juncture of accomplishment, Coir Board proudly show cases all products and machineries developed as part of its research and development initiatives at the Karnataka Coir Expo 2013. The Expo will also have on display technology & machineries developed by other research organizations and experts.

*Prof. G. Balachandran
Chairman*

Exploring the modern technologies in coir processing

- Latest technologies & machinery
- Public & Private sector participation
- Seminars
- Workshop on contemporary issues
- B2B Meet
- Interactive sessions with experts
- Technology transfer meet
- Investors' meet
- Coir Fashion Show
- Cultural programmes
